

HEALTHCARE ACCESS MARYLAND

Recovery Care Services
410-649-0500

HealthCare Access Maryland is a nonprofit agency that connects residents to public health care coverage and helps them use services effectively. We work with individuals, hospitals, policymakers, and social services organizations to strengthen Maryland's health care delivery system and make Maryland healthier.

HCAM's Recovery Care Services division help people to overcome the roadblocks that often keep them from successfully completing treatment for substance use disorder.

Jurisdictional/State Care Coordination

Our primary program helps residents in Anne Arundel County, Baltimore City, and Baltimore County overcome the challenges that can prevent them from moving successfully through all phases of recovery. Clients are referred to our programs from residential or outpatient substance abuse treatment providers.

RecoveryNet

Like other initiatives housed in HCAM's Recovery Care Services division, Maryland RecoveryNet connects Maryland residents to services that promote their independence, self-sufficiency, and stability, encouraging their completion of treatment for substance use disorder. These medical and support services include

- dental fees
- copays
- eyeglasses
- durable medical equipment
- prescriptions
- life skills and parenting classes
- gym memberships
- school supplies for MDRN service recipients
- car repairs
- legal fees and fines
- tools/materials for work

Care Coordination for women and children

HCAM offers care coordination services to women who have at least one child in their custody and who are enrolled into the Women and Children Supportive Housing Project by Behavioral Health System Baltimore (BHSB). HCAM Care Coordinators work closely with these clients and their children to help them get the whole-person services they need to complete outpatient substance abuse treatment. Linkages include referrals to insurance, health care, employment, education, housing, transportation, legal services, and more. Our Care Coordinators follow up with clients at least four times a month to adjust the care plan and track progress.

Our Care Coordinators can help clients
enroll in recovery support groups | get job-readiness training | apply for health insurance | get legal assistance | access mental health services or substance abuse treatment | find a doctor | get referrals for help paying for overdue utility bills | enroll in a GED program | obtain food and transportation vouchers | access social services (TCA, food stamps, child care) | apply for public housing.
